

**Process for Peer Selection of Resident Members of the
GME Committee**
February 2008

Residents play an essential role in the GME Committee (GMEC) – they bring experience from their clinical rotations, as well as their thoughtful considerations regarding challenges and opportunities in the clinical learning environment.

Annually in the fall, all residents and fellows are sent a communication informing them of the opportunity to play a role on the GMEC, informing them of the substantial time commitment, and soliciting nominations. Nominated residents' names are sent to the GME Office. The 4 individuals from sponsored GME programs who receive the most votes are then appointed to the GMEC to begin in January.
