

Fall 2009 Seminar Series

Serdar E. Bulun "Aromatase in Health and Disease"	Northwestern University	September 22, 2009**
Tim Hui-Ming Huang "Epigenomic Control of Gene Silencing"	The Ohio State University	September 29, 2009**
Guangbin Luo "Functional Analysis of Mammalian RecQ Helicases"	Case Western Reserve University	October 6, 2009
George N. DeMartino "Mechanisms of 26S Proteasome Assembly and Activation"	UT Southwestern Medical Center	October 13, 2009
Gregory Ira "Mechanism and Regulation of DNA Recombination"	Baylor College of Medicine	October 20, 2009
Jeffrey M. Rosen "Intrinsic Therapeutic Resistance of Breast Cancer Stem Cells"	Baylor College of Medicine	October 27, 2009
Ning Zheng "Ubiquitin Ligase Machinery: From Plant Biology to Human Disease"	University of Washington	November 3, 2009
Richard Baer "How does BRCA1 Suppress Breast Cancer?"	Columbia University	November 10, 2009
Lei Li "Fanconi Anemia and DNA Replication Forks"	M.D. Anderson Cancer Center	November 17, 2009
Ron R. Kopito "Mechanisms of Protein Quality in the Eukaryotic Cell"	Stanford University	November 18, 2009
Manjeet K. Rao "To be announced"	UT Health Science Center	December 1, 2009
Usha Ponnappan "Impact of Proteasomal Dysfunction in Immune Senescence"	University of Arkansas for Medical Sciences	December 8, 2009

***1:00 PM SEMINAR**

Seminars are held at 3:30 p.m. in Conference Room 3.002 at the
Institute of Biotechnology/Texas Research Park Campus
For information telephone Dr. Bandana Chatterjee at 210/567-7200
