Nanotherapy: Targeting Brain Tumors Using Rhenium-186

Thursday, September 10th

6:00 p.m. - 7:30 p.m.

Cancer Therapy & Research Center

Mabee Conference Room, 4th Floor of the Grossman Building

Andrew Brenner, M.D., Ph.D.

The first ever in human trial for treating brain tumors using Rhenium-186 is under way at the Cancer Therapy & Research Center. Join neuro-oncologist Dr. Andrew Brenner for a discussion on how nanotechnology is igniting hope in developing new treatment options for patients with brain cancer.
