

UNINSTALL THE CISCO VPN CLIENT

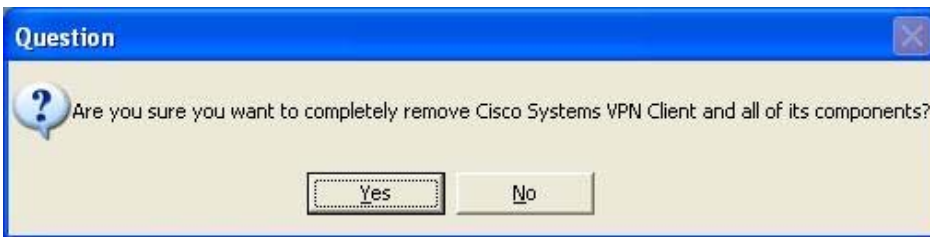

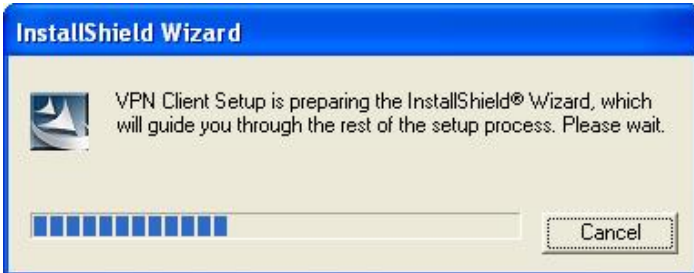

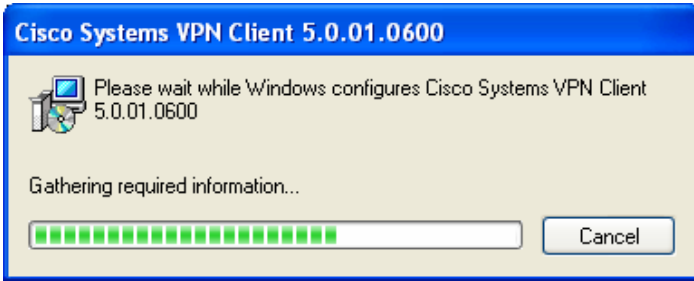

There are two ways to begin the uninstall process. If you are using Cisco VPN client Version 4.0.4b through 4.8, click on Start → Programs → Cisco Systems VPN client → Uninstall VPN Client

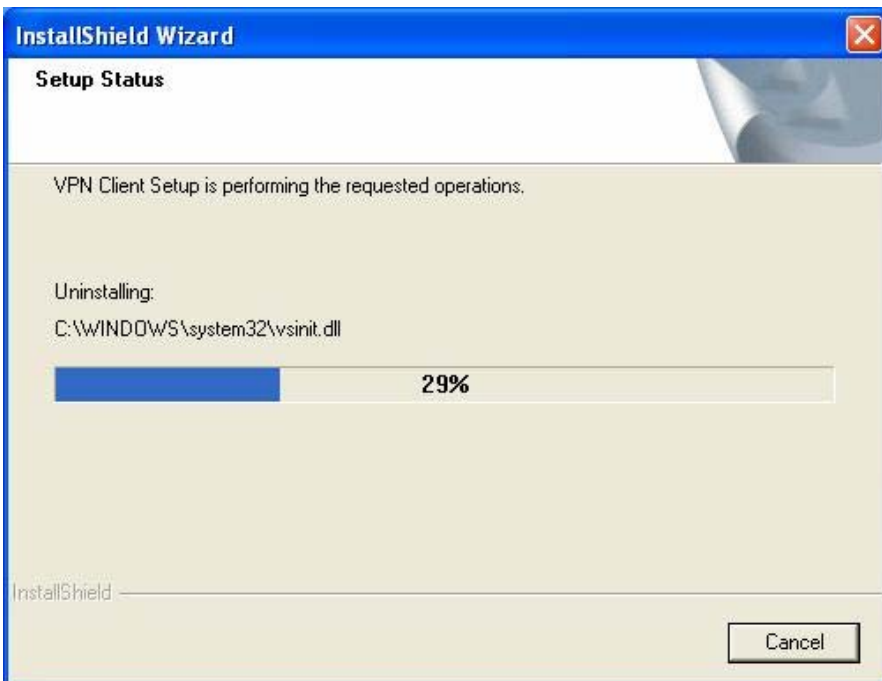

Newer versions will require you to click to Start → Control Panel. Find Add/Remove Programs and double click on this icon. Scroll down until you see the Cisco Systems VPN client and to the right, click Remove.

You will observe variants of these screen shots. They require NO action.

Click Yes

Click **Yes**

Click **Finish**

The process requires a system reboot. If you do not see a window that requests you to reboot, please reboot the device.
