

Clinical Research: Where to Begin?

Texas Health CoLab's Monthly Learning Series

Conducting research in partnership with academic or private health care systems is a complex endeavor that requires unique knowledge of the field and the myriad regulatory requirements. In her talk, Lisa Jackson will provide a broad overview of the components necessary for a successful collaboration but will focus on the essentials of clinical research including: types of research, finding a research partner, study design, outcomes, protocol development, execution of a clinical trial, closeout, ethics, reproducibility, and results reporting.

Thursday, October 25, 2018

3 – 5 p.m.

Dell Medical School Health Discovery Building Auditorium (HDB 1.208)

1701 Trinity Street, Austin, Texas

About the speaker: Lisa Jackson, JD, RN, is an attorney and registered nurse with a long career in the healthcare field as a critical care and trauma nurse, and clinical research nurse before making the puzzling decision to earn a law degree. She is the Executive Director of Research Operations at Dell Medical School after serving as the Executive Director of the Center for Clinical and Translational Science & Education and Associate Dean for Clinical & Translational Research at Stanford University, and Executive Director of the Translational Research Institute at the University of Arkansas for Medical Sciences. Lisa earned her Bachelor of Science in Nursing and Juris Doctorate from the University of Arkansas.
