

Plan for the Clinical Day

Focus for the Day:

- Physical exam – shift assessment, documentation
- Analysis of patient's lab values
- Providing patient-centered care
- Prioritization of care
- Patient teaching
- Collaboration with other disciplines
- Application of knowledge that was learned in the classroom.

Our focus is “**prioritization.**” Please discuss with your students how you prioritize care.

We are also focusing on **collaboration with other members of the health care team.** Guide your students in communicating with physicians, case managers, chaplains, physical therapy, etc.

Another focus is **patient teaching.** Each student is expected to provide some effective patient teaching.

Students are expected to provide comprehensive care to one patient.

Strategies for Staff RN

- ”Think out loud.”
- “What if questions?”

Classroom Content:

- Nursing management of the patient with diabetes and renal disease.
- Assist your student in selecting a patient with one of these conditions

I have included the student feedback tool. Please review the form and provide feedback to your student at the end of the clinical day. The student will give the form to his or her clinical faculty.

I can be reached at all times via text or call at _____ -
